TFU

I have a note written to you but not posted so the two can go together. I have title page proof. The top part could hardly be bettered - the last line 'Egypt' might be indented – my name raised close beneath the second title and put in L.C antique red. Then a good space before your name and style. I wish you would put it in ancient fashion By Fisher Unwin in Paternoster Square. I think I would have to Italic Cap on page. What do you think? I send you all the Raiders proofs I have. So I am clear at present.

Yours ever SRC
